Conservation coalition unveils interactive map

From staff reports

Blue Ridge Forever has launched its interactive Conservation Vision map.

With just a click of a computer mouse visitors can learn about some of the animals prioritized in the North Carolina State Wildlife Action Plan (SWAP); the impact protected

lands have on water quality; and the cultural heritage that is dependent on the WNC mountain landscape. Visitors to the site can also learn about what local land trusts have protected and hope to protect during Blue Ridge Forever's campaign to save 50,000 acres by 2010.

The online Conservation Vision map is available at www.blueridgeforever.info/conservation_vision.html.

The interactive map was made possible by a grant from The Conservation Fund with support from the Doris Duke Charitable Foundation.

For more information contact Valerie True, Blue

Ridge Forever's coalition coordinator, at 253-0095 extension 213 or e-mail coordinator@blueridgeforever.info.
